

Vixualizer™ Sports and Games

Vixualizer Sports and Games systems bring you the capability to set-up and professionally manage sports and gaming networking for outdoor activities like trekking, cycling, running, golf and soft-air/paint ball games.

With a fully web and software based add-on system the cost will be kept on a minimum by using already available mobile devices for the infrastructure. The tooling supports also new ways of pre- and post-processing of games and sports data.

The easy to set-up system brings you all data to a very low cost and provides to your very fingertips the real-time data and important information to support the activities.

Various options can provide you with development possibilities to create new applications and create more and more interesting functionality and opportunities.

Vixualizer Sport and Game applications;

Trekking/cycling and running:

- Position of participants
- Calculation on speed, time and position
- Personal information
